WORK EXPERIENCE

Westpac | Senior User Experience Designer

Aug 2023 - Present, Auckland

- Lead complex and highly impacted projects to make things better for customers from discovery to delivery.
 - Conducted user research, usability tests, and translated insights into actionable design improvements, increasing customer engagement by 30%.
 - Presenting design concepts, strategies, and research findings to stakeholders. Advocating for user-centered design methodologies and the importance of UX in achieving business objectives.
 - Collaborating closely with product owners, engineers, marketers, legals and other stakeholders to align design solutions with business goals, technical constraints, and user needs.
 - Providing guidance, feedback, and support to other designers to ensure high-quality work is met.
 - Ensure consistency in design language and user experience across multiple platforms (web, mobile, tablet).
 - Iterate on designs based on feedback from stakeholders and usability testing results.
 - Champion in creating and maintaining design systems, component libraries, and pattern libraries to ensure consistency across products and scalability of design solutions.

ClearPoint (Contact Energy) | Senior User Experience Designer

Nov 2022 - Jul 2023, Auckland

- Leading the user research process to understand user needs and preferences, and using this information to inform the design of digital products and experiences.
 - Developing information architecture and navigation structures that provide an intuitive and efficient user experience.
 - Creating wireframes and prototypes that outline the structure, layout, and functionality of digital products and experiences, and refining these designs based on user feedback.
 - Working closely with developers to ensure that design solutions are feasible, technically sound, and aligned with the project requirements.
 - Mentoring junior designers by providing guidance and support to ensure high-quality design work, design process and best practice.
 - Leading usability testing to evaluate the effectiveness of design solutions and identify areas for improvement.
 - Collaborating with the Head of Design, Digital Design Lead, and fellow designers to continually evolve and enhance our design practice and processes, ensuring optimal support for project delivery.

AskNicely | Senior Product Designer

Nov 2021 - Nov 2022, Auckland

- Mentor other members of the Product & Design team, both inside and outside of your product(s) on how to approach design problems, solicit feedback and drive for impactful outcomes.
 - Collaborate across teams to generate, analyze, and act on feedback and data to deliver quality experiences.
 - Work closely with Product and Engineering in the discovery and hand-off of designs to ensure high-quality execution and adoption.
 - Engage across all stages of product development using skills in concepting, design systems, user interface, and user research.
 - Conceptualize and detail user flows and end-to-end experiences via mockups, process flows, and prototypes.
 - Apply strategic thinking to design and deliver innovative user experiences that drive business outcomes.

Tax Management New Zealand | Lead UX Designer

Aug 2019 - Nov 2021, Auckland

- Directly responsible for defining and delivering user personas, sitemaps, journey maps, user flows, IA, sketches, wireframes, prototypes and also detailed specifications (work flow, page functionality, layout, IA and etc).
 - Collaborate with product manager, marketing, CTO, BA, customers and engineers.
 - Turning vision into concept using design to simplify business process, service and infrastructure.
 - Conduct User Research and User Testing with Users and document all the feedbacks.
 - Led design solution meeting with managers, stakeholders and engineers.
 - Develop detailed product design documentation that effectively communicates interaction and design ideas to development team.
 - Facilitate UX workshop with stakeholders, customers, product manager, customer support, and engineers - Design Sprint and Design Thinking.
 - Conduct both qualitative and quantitative UX research to help define and monitor adoption, engagement, and satisfaction metrics for features and products.
 - Apply Design Thinking methodology to design and deliver the best possible end to end user experience that solve user needs, business goals and user friendly platform.
 - Built transparency and realistic estimation on releasing product with internal staff and external clients.
